To Whomsoever it may concern:

We are currently working with **TheKVM, Bangalore, India**, a company active in Business Development of innovative patented technologies. We have engaged TheKVM to introduce & assist in commercialization of Origin's Wifi Human Motion Sensing Technology to ISPs, Security, Efficient Energy Management, Elderly & Patient Monitoring, Smart Homes etc. in India.

TheKVM seems to be well connected with major companies in relevant industries. We have succeeded in generating expression of interest from most of the companies we have met till now. They are ready to test & evaluate our technology for commercialization.

TheKVM is flexible and follows up on its promises; connecting us with potential clients & partners and actively participating in techno-commercial discussions. TheKVM is proactive in providing significant market insights.

We would recommend their service for technology commercialization and developing the Indian market.

Thanking you,
